

Cracking the Millionaire Code Clues

Some of the Coded messages in Cracking the Millionaire Code are simple and some are extremely difficult. In fact, it might take years and/or thousands of people working on the most difficult codes to crack them. You see, the codes are like life and work and business and play. What appears easy to some, can be extremely hard and time consuming for others and vice versa.

Working solo, it is hard to get everything done that needs to be done because no one person has all the talents, skills, resources and intelligence needed to get the job done, right and on time. When a team of people work on a problem or play a game, the group dynamics...the synergy sparks genius and voila ...Problem—solved! Task—accomplished! That’s what happens when everyone on a team contributes their own special gifts—the puzzle pieces fit and the puzzle is solved. What one person could not see, another does.

Another factor besides teamwork that generates success is having knowledge. Where do you get the knowledge to crack the Millionaire Codes?

What’s that you say, “You don’t have a clue?” Well, no pun intended; yes, you look for clues.

When you find Cracking the Millionaire Code Clues, they will help you crack the codes. Clues will be hidden in strange and wonderful places. Keep checking our newsletters, Keep checking the rules, keep checking here, there and everywhere. Keep checking with your TEAM.

AHA! What a great idea!

For every person you add to your team who signs up at our website to play our 101 Day Cracking the Millionaire Code Game, we will give you Points which you can buy clues with or add to your overall game store. Sounds like a good deal, doesn’t it? It is win/win for everyone.

Here are a few Free Clues for you to use right now.

Clue: What is black and white and read all over? Look there

Clue: When we want to make an announcement, what do we do? Look there.

Clue: How did you learn the names of the lines and spaces when you started to read music? Figure that out and you have cracked half the code.

Clue: If you don’t know Morse Code, where could you find it? Look there.

Clue: Seeing double, upside down and backwards on page 73? Use a mirror.

Well, that’s enough clues for now. Happy hunting and decoding.
